Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 13, 2002 has been entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stoltz in view of Fennema and Patel et al.

Stoltz discloses a flavor enhancer formulation comprising oil and a flavor (see entire patent, especially column 10, lines 35-56).

The claims differ as to the use of specific flavor enhancers and the use of silicon dioxide.

All of the claimed flavor enhancers are notoriously well-known in the art and are used merely for their art-recognized function. Fennema discloses nucleotide flavor enhancers including MSG, disodium guanylate, and disodium inosinate (see pages 734, 735, and 816).

Patel et al disclose a flavor composition comprising silicon dioxide, where the silicon dioxide is used as a thickener (see entire patent, especially the abstract and claim 3).

It would have been obvious to a person of ordinary skill in the art, at the time the

Art Unit: 1761

invention was made, to use any of the claimed flavor enhancers and silicon dioxide as taught by Fennema and Patel et al in that of Stoltz because the use of flavor enhancers and the use of silicon dioxide is conventional in the art.

In the absence of unexpected results, it is not seen how the claimed invention differs from the teachings of the prior art. Applicant's claims are drawn to a combination of known components which produces expected results, see In re Kerkhoven 205 USPQ 1069 and In re Gershon 152 USPQ 602.

All of the claim limitations have been considered. None of them are seen as serving as basis for patentability. No claim is allowed.
